## HR6S-AT Safety Relay Module

## Equipped with time delay output for stop category 0 and stop category 1

- Protects both the operator and the machine by immediately stopping dangerous movements (stop category 0 ) when instructed to stop by the operator or or when a failure in the safety circuit is detected. Also, the safety module is equipped with a stop category 1 delay output, which allows the motor to stop after deceleration.
- The selector on the front can be used to set the delay time to a value from 0.1 seconds to 15 minutes. (Can also be set to 0 seconds.)
- The delay output can be canceled by the S21-S22 or S31-S32 terminal (vacant terminal), and the delay output is immediately cut off when canceled.

Output expansion possible
*Available in February 2021.

## HR6S-AT

Package Quantity: 1

| Terminal | Part No. | Supply Voltage |
| :--- | :--- | :--- |
| Push-in terminal | HR6S-AT1C | 24 V AC/DC |
| Screw terminal <br> (available only on request) | HR6S-AT1P | 24 V AC/DC |

- One sealing strip (see page 26) is included with each product.

## Overview of Application Functions

Monitoring of Emergency Stop circuits as per ISO 13850 and IEC 60204-1, stop category 0,1

Monitoring of guards as per ISO 14119/14120 with coded magnetic switches

Monitoring of guards as per ISO 14119/14120 with interlock switches

## Monitoring of two hand control devices (IIIA or IIIC)

- Monitors two-hand control devices (IIIA or IIIC) that are required to comply with International Standard ISO 13851.
- IIIC can monitor two-hand pushbuttons for synchronization within 0.5 seconds.
- If one of the two buttons is released during operation, the control sequence is canceled.
- Connects up to two input devices in parallel (except for two-hand control devices (IIIC)). (Outputs are enabled when all inputs are enabled.)

Output expansion possible
